Lg model lfxs24623s review

Rated 1 out of 5 by Anonymous from 5 years 7 months in and all cooling stopped working. Do not buy this product, it will not last! Just over 5 years warranty and all the cooling part comes out. The freezer went up to 43 degrees and the fridge no longer cooled. I don't have to replace a 5-year-old refrigerator. Published Date: 2020-10-23 Rated 1 out of 5 kimberly11 by Scary Appliance We bought this product in late 2017 or early 2018. We had one time when the compressor stopped, but we were able to fix it on the phone. Now the compressor is completely down, we haven't had a fridge for 5 days and we're still waiting to hear from them about when a repair person might come. I haven't heard anything. We'll never buy LG again. Published Date: 2020-10-14 Rated 1 in 5 by Terryq by Compressor Shot I Bought this refrail 4 years ago. 1 year in the car ice left and was replaced. Now I just found out the compressor is dead. The authorized dealer said he will replace it with a new model compressor, but it ensures it will go again. After reading the reviews, I can see why this model was discontinued. I'm disappointed with LG at this time. I spent a lot of money and now I have to worry every day about the compressor going again. LG needs to replace this fridge for its customers. Now I have to wait 5 to 6 days for the part to come and then have the authorized dealer come back.
